

COLLEGE SPORTS FIELDS NEED EXTRA CARE. ASBA CAN HELP

By American Sports Builders Association

Who doesn't like to have a showpiece of a stadium, a soccer field, a football field – even a space for multiple sports from grass court volleyball to quidditch? And who doesn't want to host the big important championship events? But maybe your facilities aren't quite...well, spotlight-ready right now. Maybe your field needs work – more work than your maintenance department is prepared to handle.

That's why you need to back away from Google (Close that search engine now! Right now!) and use these trusted resources to find what you need. The American Sports Builders Association has been helping college professionals like coaches, athletic directors and administrators connect with design professionals, contractors and suppliers for more than 55 years.

➔ Sports Fields: A Construction and Maintenance Manual

This book promotes the quality construction, maintenance and repair of synthetic turf facilities by providing information to facility owners, administrators, coaches, builders, architects and engineers. It can be purchased in both electronic and hard copy format by going to [this link](#).

Note – If you have other sports facilities that need work, ASBA has a full line of its manuals available at [this link](#). Check out our Construction and Maintenance Manual series on tennis courts, pickleball courts, running tracks and indoor synthetic surfaces.

➔ MEMBER DIRECTORY

Available FREE as a [downloadable pdf](#) or [online](#), this resource allows you to find the companies you need – whether those are design professionals, consultants, contractors or suppliers of equipment or material – and to connect with them easily, by providing you with all the contact information you need.

➔ CERTIFIED BUILDERS

ASBA members can voluntarily pursue certification in Tennis Courts, Tracks or Fields. You can access a list of builders with these certifications at [this link](#).

➔ BID INFO REQUEST

A free service from ASBA, this form allows you to list what you need (no matter whether it is work on an existing facility, information on building a new facility from the ground up – or just getting some equipment or supplies, the [Bid Info Request Form](#) is a fast-track way of getting answers to all your questions.

➔ ALL ATHLETIC FACILITY DIAGRAMS AT YOUR FINGERTIPS!

Updated diagrams for multiple sports facilities are available free of charge using [ASBA's Design Showcase App](#), available for iPhone or Android devices.

➔ SO MUCH MORE!

And there's so much more. ASBA has links to Construction Guidelines, technical articles and relevant ASTM Standards, all on its website. All you need to do is [click here](#) to get the learning started.
